

BAR MODELLING

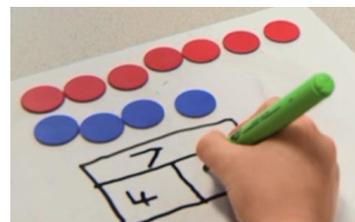

YEARS 1 - 6

Have you ever wondered how to get pupils to become confident with those trickier problem solving questions? Bar Modelling is a key tool for teaching for Mastery. It accelerates learning by offering children and young people a visual method of learning and problem solving.

Aims of the course:

- Explore Bar Modelling as a tool to make the transition from concrete to abstract methods.
- Understand how this powerful approach works.
- Build confidence and skills to create your own bar models.
- Develop insight into how you can train students to use the Bar Modelling approach even if you are not currently using a teaching for mastery approach.
- Stretch and challenge your more advanced ability students.
